

ARM Instructions Worksheet #8

Bitwise and Bitfield Instructions

Prerequisite Reading: Chapter 7

Revised: March 26, 2020

Objectives: To use the web-based simulator ("CPULator") to better understand ...

1. The operation of the bitwise instructions (MVN, AND, ORR, EOR and BIC)
2. The operation of the bitfield instructions (BFC, BFI, UBFX, and SBFX)
3. The use of the C left-shift operator to create constants.

To do offline: Answer the questions that follow the listing below. (Numbers at far left are memory addresses.)

```

                .syntax      unified
                .global      _start

00000000  _start:  LDR        R0,=0xFFFF << 16      // *** EXECUTION STARTS HERE ***
00000004                MVN        R0,R0
00000008                EOR        R0,R0,0xFF << 12
0000000C                BIC        R0,R0,0xFF << 0
00000010                ORR        R0,R0,0xFF << 12
00000014                AND        R0,R0,0xFF << 12

00000018                LDR        R1,=0x23456789
0000001C                BFI        R0,R1,24,8
00000020                BFC        R0,12,8
00000024                UBFX       R1,R0,24,8
00000028                SBFX       R1,R0,24,8

0000002C  done:    B          done                    // Infinite loop

                .end

```

What is left in register R0 after executing the LDR instruction at 00000000₁₆?

R0 (as hexadecimal)

ffff0000

What is left in register R0 after executing the MVN instruction at 00000004₁₆?

R0 (as hexadecimal)

0000ffff

What is left in register R0 after executing the EOR instruction at 00000008₁₆?

R0 (as hexadecimal)

000f0fff

What is left in register R0 after executing the BIC instruction at 0000000C₁₆?

R0 (as hexadecimal)

000f0f00

What is left in register R0 after executing the ORR instruction at 00000010₁₆?

R0 (as hexadecimal)

000fff00

What is left in register R0 after executing the AND instruction at 00000014₁₆?

R0 (as hexadecimal)

000fff00

What is left in register R1 after executing the LDR instruction at 00000018₁₆?

R1 (as hexadecimal)

23456789

What is left in register R0 after executing the BFI instruction at 0000001C ₁₆ ?	R0 (as hexadecimal) 8900ff00
What is left in register R0 after executing the BFC instruction at 00000020 ₁₆ ?	R0 (as hexadecimal) 89000000
What is left in register R1 after executing the UBFX instruction at 00000024 ₁₆ ?	R0 (as hexadecimal) 00000089
What is left in register R1 after executing the SBFX instruction at 00000028 ₁₆ ?	R1 (as hexadecimal) ffffff89

Getting ready: Now use the simulator to collect the following information and compare to your earlier answers.

1. Click [here](#) to open a browser for the ARM instruction simulator with pre-loaded code.

Step 1: Press F2 exactly once to execute the LDR instruction at 00000000₁₆

What is left in register R0 after executing the LDR instruction at 00000000 ₁₆ ?	R0 (as hexadecimal) ffff0000
---	---------------------------------

Step 2: Press F2 exactly once to execute the MVN instruction at 00000004₁₆

What is left in register R0 after executing the MVN instruction at 00000004 ₁₆ ?	R0 (as hexadecimal) 0000ffff
---	---------------------------------

Step 3: Press F2 exactly once to execute the EOR instruction at 00000008₁₆

What is left in register R0 after executing the EOR instruction at 00000008 ₁₆ ?	R0 (as hexadecimal) 0000f0ff
---	---------------------------------

Step 4: Press F2 exactly once to execute the BIC instruction at 0000000C₁₆

What is left in register R0 after executing the BIC instruction at 0000000C ₁₆ ?	R0 (as hexadecimal) 000f0fff
---	---------------------------------

Step 5: Press F2 exactly once to execute the ORR instruction at 00000010₁₆

What is left in register R0 after executing the ORR instruction at 00000010 ₁₆ ?	R0 (as hexadecimal) 000fff00
---	---------------------------------

Step 6: Press F2 exactly once to execute the AND instruction at 00000014₁₆

What is left in register R0 after executing the AND instruction at 00000014 ₁₆ ?	R0 (as hexadecimal) 000ff000
---	---------------------------------

Step 7: Press F2 exactly once to execute the LDR instruction at 00000018₁₆

What is left in register R1 after executing the LDR instruction at 00000018 ₁₆ ?	R1 (as hexadecimal) 23456789
---	---------------------------------

Step 8: Press F2 exactly once to execute the BFI instruction at 0000001C₁₆

What is left in register R0 after executing the BFI instruction at 0000001C ₁₆ ?	R0 (as hexadecimal) 890ff000
---	---------------------------------

Step 9: Press F2 exactly once to execute the BFC instruction at 00000020₁₆

What is left in register R0 after executing the BFC instruction at 00000020 ₁₆ ?	R0 (as hexadecimal) 89000000
---	---------------------------------

Step 10: Press F2 exactly once to execute the UBFX instruction at 00000024₁₆

What is left in register R1 after executing the UBFX instruction at 00000024 ₁₆ ?	R1 (as hexadecimal) 00000089
--	---------------------------------

Step 11: Press F2 exactly once to execute the SBFX instruction at 00000028₁₆

What is left in register R1 after executing the SBFX instruction at 00000028 ₁₆ ?	R1 (as hexadecimal) ffffff89
--	---------------------------------
